EDUCATION

University Of Auckland

Bachelor of Science, Majoring in Computer Science

Auckland, NZ

Feb. 2024 – Nov 2027

Macleans College

NCEA: Calculus, Statistics, Physics, Design, Advanced P.E

Auckland, NZ

Feb. 2018 – Nov 2023

EXPERIENCE

University Of Auckland Computer Science Club

Tech/Education Executive

Aug. 2025 – Present

Auckland, NZ

- Engineered a reusable website template for a club hackathon, improving efficiency and reducing setup time for future events. Additionally served as the MC and technical judge, evaluating projects for code quality, innovation, and feasibility.
- Currently developing the Computer Science Club's official website, applying software engineering principles such as modular architecture, responsive UI design, and version-controlled development to deliver a reliable and scalable platform for members.
- Built and facilitated technical workshops focused on practical software engineering concepts, creating detailed instructional materials, live coding demos, and hands-on exercises to help students strengthen their development skills.

PB Technologies

Operations Assistant

Nov. 2022 – Feb. 2023

Auckland, NZ

- Processed and tracked customer returns, warranty claims, and product authorizations with respect to company policies
- Ensured accurate documentation and data entry into internal systems for returned goods and stock adjustments.
- Collaborated with warehouse and logistics teams to manage the physical flow of returned products.
- Supported the operations team with general administrative tasks to ensure smooth daily workflow.

PROJECTS

Personal Website | NextJS, React, Javascript, TailwindCSS

Aug. 2025 – Aug. 2025

- Designed and developed a modern, high-performance personal website using Next.js and React, focusing on component reusability, maintainability, and smooth user experience.
- Integrated interactive features using JavaScript and React hooks, enhancing navigation flow and user engagement while keeping the application lightweight.
- Deployed and version-controlled the project using industry-standard workflows (Git, GitHub, Vercel), ensuring clean commits, clear documentation, and easy scalability for future updates.

Quick Quiz! | HTML, CSS, Javascript, Node.JS, Express.JS

April 2025 – April 2025

- Quick-Quiz is an interactive web application that generates Kahoot-style quizzes from any uploaded PDF using the OpenAI ChatGPT API.
- Full stack web application that uses Node.js with Express on the backend to serve static files and handle API requests.
- OpenAI API integration to generate quiz questions dynamically.

Pylib | Python, CLI Tool Development

Sep. 2025 – Sep. 2025

- Developed a Python command-line tool that selects a random library within Auckland and displays it on the terminal, supporting parameters for filtering locations and customizing selection behavior.
- Packaged the tool for global terminal execution, enabling users to run the pylib command from any directory.
- Improved user experience by designing clear command outputs, helpful error messages, and flexible argument handling to ensure reliability and ease of use across environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, HTML/CSS

Frameworks: React, Tailwind, Node.js, Flask

Developer Tools: Git, VS Code, PyCharm, IntelliJ
